

Characterization of distributions to shareholders in 2019

A distribution by a corporation to its shareholders is treated as a dividend for US federal income tax purposes to the extent it comes from current or accumulated earnings and profits of the corporation and thereafter as a return of capital to the extent of the shareholder's basis in his or her shares. Generally, a distribution that exceeds current or accumulated earnings and profits and the shareholder's basis will be treated as capital gains.

In 2019, Scorpio Tankers Inc. ("STNG") distributed a total of \$21.3 million to holders of its common stock. STNG has determined that as of December 31, 2019 \$21.3 million (100%) was distributed in excess of the accumulated earnings and profits.

You should consult your tax advisor regarding the federal, state, local and other tax consequences of those distributions.
